

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph beginning at page 10, line 24, with the following rewritten paragraph:

-- In this regard, a hollow cylinder 24 is set up in a rear portion of the vehicle body 4 with the predetermined space from the supporting wall 14, the hollow cylinder 24 as high as the axle. This hollow cylinder 24 passes through said hole portion 20. A washer screw 26 is screw-fixed to the edge of the passed-through hollow cylinder 24, and a compression spring 8 energized in a direction disengaging the washer ~~spring~~ screw 26 and the stepped portion 22 is set therebetween. --
